In the Matter of:

U.S. National Phase Entry

Under 35 USC § 371 from

the International Application of

Walter August Maria Broeckx et al.

Int'l Application No. PCT/US00/03521

Filed in the RO/US on 09 February 2000

Entitled: Low Density Particulate Solids Useful in Laundry

Detergents

## PRELIMINARY AMENDMENT UNDER 37 CFR § 1.112

**Assistant Commissioner for Patents** 

Washington, D.C. 20231

Dear Sir:

Prior to Examination and computation of the fees for entering the captioned International Application into the U.S. National Phase, please preliminarily amend the above-identified application as follows and consider the following Remarks.

## **AMENDMENTS**

## IN THE CLAIMS

Please delete Claims 1-12 and insert therefor new Claims 13-23 as follows.

- 13. (New) A laundry detergent composition comprising:
  - a) one or more low density expandable particles selected from the group consisting of microspheres, cavity-forming components, pore-forming components, and mixtures thereof; and
  - b) one or more non-enzyme comprising laundry adjunct ingredients in the form of a particulate solid;

wherein said exponible microsphere when expanded has a density of less than 0.4 g/mL.

- 14. (New) A composition according to Claim 13 wherein said microspheres comprise an expandable materials selected from the group consisting of liquid hydrocarbons, gases, and mixtures thereof.
- 15. (New) A composition according to Claim 13 wherein said low density particles comprise a thermoplastic material.
